## RESEARCH AND WORK EXPERIENCE

**Massachusetts Institute of Technology**, Cambridge, MA

**Computer Science and Artificial Intelligence Laboratory (CSAIL)** 2017-Present

- ♦ Applying novel algorithmic techniques that scale to large, high-dimensional data sets to derive better biological insight from single cell experiments (<https://github.com/brianhie/scanorama> and <https://github.com/brianhie/geosketch>).
- ♦ Achieved privacy-preserving and scalable neural network training on large, cryptographically hidden data sets, applied to drug-target interaction prediction (<https://github.com/brianhie/secure-dti>).

**Illumina, Inc.**, San Diego, CA

**Machine Learning Intern** 2018

- ♦ Early stage, experimental project requiring analysis of large genomic data sets via novel unsupervised and semi-supervised statistical machine learning methods.

**Salesforce.com, Inc.**, San Francisco, CA

**Software Engineer, Cloud Infrastructure** 2016-2017

- ♦ Developed algorithms and a distributed pipeline that scaled to petabytes of system log and metric data to generate accurate key performance indicators visible to top company leadership.

**Stanford University**, Palo Alto, CA

**Hunter Fraser Laboratory, Biology** 2013-2016

- ♦ Applied machine learning methods to predict associations between transcription factor binding and gene expression.
- ♦ Used statistical methods to explore the relationship between genotype and the formation and function of circular RNAs.

**Stanford University**, Palo Alto, CA

**Shakeosphere Project, Digital Humanities** 2016

- ♦ Applied graph-theoretic algorithms to understand the evolution of social networks of early modern English authors, printers, publishers, and booksellers.

**Microsoft Corporation**, Redmond, WA

**Software Engineering Intern, Azure Compute and Microsoft Research** 2015

- ♦ Investigated different distributed scheduling algorithms and their impact on utilization and availability on a simulated Azure data center.

**Synaptics, Inc.**, San Jose, CA

**Systems Architecture/Algorithms Intern**

2014

- ♦ Developed and implemented an algorithm for optimal touchscreen finger tracking by solving the minimum weight bipartite matching problem.
